Wireless/Mobile History 1880 - 2020

Access is all wireless

程序代写代做 CS编程辅导

- Wireless, in the context of WiFi, started in 1999.
 - First it was a niche technology
 - Now it is standard in all computing devices
- Most of the access (end user connectivity) is wireless
- Mobile phones, tablets have multiple wireless technologies: WiFi, Bluetooth, Cellular, but *no wired connectivity*

Summary: wireless and mobile trends

程序代写代做 CS编程辅导

1. WiFi has grown worldwide in just 15 years and continues to develop in capacity with innovations in PHY and data link layer
2. Bluetooth has reached the 5 billion milestone in 2020
3. 5th generation of cellular technology is already here in 2020 with massive capacity and new features
4. Wireless speed growth following Moore's Law
5. Mobile subscriptions are approaching world population
6. Many innovative new technologies are being developed to meet the unabated demand in wireless and mobile communications
